VI. ALTERNATIVE ROUTES

A. Organization

The following Alternative Route Plans are organized by the State Route, travel direction, and the exit number where the alternative route begins. For example, Plan No. 101-S-426 would indicate the alternative route plan for US 101, in the southbound direction, starting at exit 426.

If there is more than one alternative route available, then the alternative route plan number is supplemented by the alternative route option number. For example, Plan No. 101-S-429A-2 would indicate option #2 for the alternative route for southbound US 101 starting at exit 426. If only one alternative route option is available, no option number is included in the plan number.

The overall list of Alternative Routes is arranged as follows:

- SB US 101 from north to south
- NB US 101 from south to north
- SB I-280 from north to south
- SB I-280 from south to north
- WB I-380 from east to west
- EB I-380 from west to east
- WB SR 92 from east to west
- EB SR 92 from west to east

B. Alternative routes by Incident Location

The following table provides a quick reference between the location of the incident and the nearest Alternative Route plan number. In some instances, due to the severity of the incident and/or amount of queue build-up, it may be advisable to implement the alternative route further upstream.
