Highlights

Emergency Management and Effective Evacuation Preparation

In response to the continued threat of wildfires and other disasters within our community and the greater San Francisco Bay Area, city officials would like to provide the following information related to best practices associated with the need for evacuations throughout Belmont.

When it comes to evacuation planning, there are no designated routes since the exact location of the hazard will impact the safest advisable route. Many people expect designated evacuation routes to be in place, but this is only the case for communities that experience hazards with advanced warning, such as hurricanes and tsunamis.

The police department is the lead agency in coordinating evacuations. During an incident, law enforcement and the fire department will establish unified command and based on the situation and location of the hazard will determine areas needing evacuation. They will also determine the safest available evacuation routes. Once an evacuation is ordered, City and County Office of Emergency Services (OES) will be involved in supporting evacuees with emergency sheltering and by sending ongoing alerts and notifications.

Community members will be notified of evacuation orders in three primary ways: 1) Reverse 911 for landline phones; 2) SMC Alert for individuals who have opted-in to the system (mobile, landline phones, text and email notifications are available through this system); and, in the direst of circumstances, 3) mobile loudspeakers and door to door notifications.

An additional method may be used based on the severity of the situation. The Integrated public alert and warning system (IPAWS), which includes the Wireless Alerting System (WEA)-most often used as an "Amber Alert", can be requested by the Incident Commander of County OES. City governments are not authorized to send messages with this system and rely exclusively on the County OES to activate. County OES may also self-initiate messages using this system.

It should be noted, there are several state level legislative actions related to this issue that have impacted local planning efforts to develop comprehensive plans, templates and process flows for the interaction of Cities and the County. A work group encompassing law enforcement, fire, local emergency management, County OES, County PIO, City PIO and County Comms has been working over the last months to create plans related to all emergency alert and warning systems in use in San Mateo County, including the methods of employing IPAWS/WEA.

[Back to Top](#)

Community members should take active measures, especially during September as it is National Preparedness Month, to prepare themselves for all hazards, including earthquakes and wildfire. In the case of earthquakes, individuals should be prepared to shelter in place, and should have emergency supplies on hand to last 7-10 days. In the case of wildfire, all individuals living in a hazard area should prepare a "Go-bag" or "go-kit" that is always packed and at the ready to leave in a moment's notice.

This go-kit should include copies or digitally stored versions of important or irreplaceable documents such as identification, insurance, deeds and titles. If the family has pets, individuals with special needs or children, then other item such as vaccination and medical records, medications, special dietary food items, assistive devices, pet food, formula, diapering supplies, should be included in the go-kit.

Families should have alternate communication plans in place to reach loved ones if regular mobile and landline phone services are impacted by the incident. Families should also have predesignated meeting places to reunite with their loved ones if it is necessary to leave the area. The best option for most people during an evacuation is to seek shelter with family and friends, rather than emergency shelters due to their level of emotional and physical comfort.

Finally, community members must remain vigilant and monitor their surroundings. If they observe a hazardous condition, they should take immediate steps to ensure their personal safety, whether they are notified by public safety authorities or not. While multiple communication methods will be used, no method is 100% guaranteed effective. Individuals must take initiative to engage with the alert and warning systems available by signing up for www.smcalert.info or by texting their zip code to 888-777. Residents in the Wildland Urban Interface (WUI) must make efforts to maintain defensible space and clear vegetation. They should also consider other measures such as evaluating roofing materials and attic vents and clearing out gutters.

Our fire and police departments have checklists, toolkits and resources available to support community members in their efforts to prepare. We also offer classes like Get Ready, CERT, and other community preparedness classes geared toward residents in the WUI. Preparedness is everyone's responsibility, and we try our best to share our knowledge with the community, but the community must be willing to seek us out and take action to mitigate and prepare for potential all-hazards.

Did you know that if a fire starts in your home,
you may have just *two minutes* to escape?

Smoke Alarms Save Lives!

We will be in Belmont, Foster City, and San Mateo offering free smoke alarm installations on Saturday, October 27, 2018 from 10:00am – 2:30pm

**American
Red Cross**

For an appointment, call (650) 259-1769.

City Hall Lobby ADA Compliance/Customer Service Remodel

Phase II of this significant ADA compliance project has begun, as the Permit Center counter installation began this week and will continue through Monday. Installation of the security access doors on the 3rd floor also began. ADA compliance upgrades have been completed in the Lobby bathrooms and the contractor is still coordinating a fire alarm installation date with the service provider before those restrooms can be opened for public access.

The Permit Center continues to be temporarily relocated to the 3rd Floor of City Hall until the completion of Phase II. Information regarding interim Permit Center accommodations are available on the City's website.

Employee Spotlight

Public Works Engineering

Please help me welcome Anwarbeg (Amwar) Mirza, our new Associate Engineer in the Public Works Department. Anwar comes to us from the City of Cotati and will be working on Land Development Projects and helping us with the Implementation of the Belmont Village Specific Plan.

Anwar has a master's degree in civil engineering from San Jose State University and has over 10 years of experience working in Public Works. He is an avid hiker and cricket player and like most of us in Public Works, he is a Foodie! We can't wait for the next potluck! If you are around the 3rd floor, please stop by and say "hello".

[Back to Top](#)

Also a new member of the Public Works Engineering team is, Justin Lai, Associate Civil Engineer, focusing on Traffic and Transportation. Justin was previously an Associate Engineer for Freyer & Laureta, Inc. working on both public and private projects for the last eight years. Born in Palo Alto and raised in Belmont, he continued his studies in San Luis Obispo. After completing his Bachelor's Degree at Cal Poly in Civil Engineering, he returned home to the Peninsula to work on projects throughout the area.

When he is not working you can probably find him on the basketball court, beach, or climbing gym. He is also an avid photographer and videographer with way too many hobbies to list. If you haven't already met Justin, stop by to say hi and introduce yourself.

Public Works Maintenance

Public Works Jaime Monge previously worked for the City of Danville
Thomas Cronin previously worked for Ranger Pipelines Inc.

Both Jaime and Thomas are hard workers who are eager to learn all about our operations here in Public Works and we are happy to add them to team Belmont!

Twin Pines Master Plan

We need your input! Stop by the Fit, Fun Family Day at Barret Community Center on Saturday, Sept 29 to share your ideas for polishing the jewel of Belmont! Or, catch our 'pop-up table at near Starbucks at Carlmont Shopping Center on Sunday and Tuesday morning. Don't feel like going out? Fill out our online survey at www.Belmont.gov/tpmpsurvey . We'll be unveiling our preliminary conceptual designs at the Save the Music Festival on October 14th.

Twin Pines Park... Parking

Friday October 12 through Sunday October 14, Twin Pines Park will be mighty busy. Two big events, the Water Dog Run and Save the Music, will require some adjustments to our usual routine. Please bear with us as we restrict parking in certain areas to allow for set up and event operation. On Friday, City employees will be asked to park off site so there'll be plenty of room for Seniors to park near the Senior Center for scheduled programs. If you're otherwise visiting the park on Friday the 12th, please plan to park on Ralston Avenue or downtown. Thank you in advance for your understanding!

Parks, Fields and Facilities

At Barrett Community Center, asphalt repairs were made. This week, staff is focusing on removing cracked sections of asphalt near walkways around the blacktop and playground. This work is a significant improvement to Barrett Community Center and ensures a usable, play surface for years to come.

At the Sports Complex, a water main leak was detected. A large wet area appeared on the South Field. Staff traced the leak and repaired the pipe. In this instance, an aging pipe fitting had separated from the pipe. New, more reliable components were installed and the water supply was restored to the facility.

Trees were trimmed for visibility and general health along Ralston Avenue in the median between Alameda De Las Pulgas and Cipriani Blvd. While trimming the trees, a defective irrigation was discovered and repaired.

Daily maintenance continues at all park and facility sites including the daily preparation of the South Field for adult league softball, and the weekly mowing of lawns throughout town.

Belmont Community Learning Center

Little Reds Barnyard Friends was on site at BCLC with pony rides and farm animals. Each child had the opportunity to ride the pony and pet the farm animals. Thank you to our PTO for sponsoring this enrichment activity.

Teen Zone

Kickball, Chili dogs – the chili was made from scratch! Cookie Decorating. The ‘Next Gen’ movie. Healthy snacks. Those are but a few of the Teen Zone activities this week. This program is free to all middle schoolers. Stop by and check it out!

Twin Pines Community Center

Matter of Balance Class

The Matter of Balance Class returns to the Twin Pines Community Center. A combination of facilitated discussions and gentle but effective exercise program to manage and prevent falls, this 8-week program is sponsored by both Sequoia Hospital Dignity Health and Stanford Hospital, and is free for participants 50 and over.

Public Works

Sewer and Water Rehabilitation Project

As part of City's ongoing sewer capital replacement program to tackle aging and deteriorated sanitary sewer infrastructure and Mid-Peninsula Water District (MPWD) capital improvement program, the City has contracted with K.J. Woods to rehabilitate defective and failing sewer and water mains located throughout the City. This is the first joint project between City of Belmont and Mid-Peninsula Water District. The project underground work has been successfully completed ahead of schedule. The contractor replaced 3,000 feet of sewer pipes and constructed over 2,800 feet of new water mains, installed additional water services, rehabilitated manholes, and restored sewer laterals on Davey Glen Road, Belburn Dr., Academy Dr., Francis Avenue, and Francis Court. The next step before completing this project is pavement restoration, which will start on the week of September 17th and is expected to finish by the end of the month.

[Back to Top](#)

Sewer and Storm Division

As part of Winter preparation, the Sewer and Storm Division inspected 152 DI's and manholes. The division also inspected four of Belmont's Winter Hot Spots to ensure clear passage prior to rainy season. Photos of Winter Hot Spots below.

Project Updates and Traffic Advisories

Ralston Avenue Sewer Rehabilitation Project Phase II:

Ralston Avenue:

The plumbing contractor will be continuing work on Ralston Avenue between Alameda de las Pulgas and Villa Avenue. Contractor will continue to excavate the existing manhole at the intersection of Ralston Avenue and Alameda De Las Pulgas. They will then work their way down Ralston Avenue and prepare all manhole locations for the pipe reaming of existing 12-inch VCP to 18-inch HDPE. This work is scheduled to take place from Monday, October 1, 2018 through Friday, October 5, 2018 with extended construction hours from 9:00 am – 4:00pm. Traffic evaluations will take place and granted working hours will be adjusted accordingly at the City of Belmont discretion. Traffic control and flaggers will be in place during these working hours to help alleviate traffic congestion.

Belmont Sewer and Water Rehabilitation:

Francis Avenue, Academy, and Davey Glen Road:

The contractor will not be on site Monday, October 1 – Wednesday, October 3, 2018. Striping of the new pavement on Francis Avenue, Academy Avenue, and Davey Glen Road may take place on Thursday October 4, and Friday, October 5, 2018. This work will take place between normal working hours of 8:00 am – 5:00 pm. Traffic control will be in place with flaggers during striping operations.

Tahoe at Ralston Avenue Intersection Project:

Ralston Ave at Tahoe Drive:

The electrical contractor may be installing electrical wire for the new traffic signals and street lights. This work is scheduled for the week of Monday, October 1, 2018 to Friday, October 5, 2018. One lane of traffic may be needed, traffic control will be in place between the hours of 9:00 am – 3:00 pm.

Shoreway Sewer Replacement Project:

Shoreway Road:

Contractor will continue potholing for utilities along Shoreway Road and possibly starting to install new sewer main between Motel 6 and 1385 Shoreway Road. Traffic control with one lane closed and flaggers will be stationed. This work is scheduled for the week of Monday, October 1, 2018 to Friday, October 5, 2018 with normal working hours of 8:00 am – 5:00 pm.

1401 Shoreway Sewer Replacement Project:

Shoreway Road:

Contractor will continue potholing for utilities along Shoreway Road between Cormorant Drive and 1385 Shoreway Road as well as surveying for the new sewer alignment. Traffic control with one lane closed and flaggers will be stationed. This work is scheduled for the week of Monday, October 1, 2018 to Friday, October 5, 2018 with normal working hours of 8:00 am – 5:00 pm.

South Road Intersection Project:

Ralston Avenue at South Road:

Contractor (Columbia Electric) and staff will be on site on Thursday, October 4, 2018 to work on energizing the new traffic signals. No traffic control will be necessary for this work as it is all off the street. The work is scheduled between normal working hours of 8:00 am – 5:00 pm.

Upcoming Events

Notre Dame de Namur Charter Week Activities

Notre Dame de Namur University invites you to campus for Charter Week events the week of October 8–13, celebrating the college’s 150th anniversary since receiving its charter from the state. This is also the 150th anniversary of the opening of Ralston Mansion. Please see the flyer for details. The historic panel discussion on the 10th will include representatives from the Sisters of Notre Dame de Namur, who acquired the Ralston property in the early 1920’s, as well as Belmont’s resident historian Denny Lawhern and President of the Historical Society, Karl Mittelstadt.

This is a great opportunity for the community to learn the history of the campus, as well as the austere and beautiful Ralston Mansion, which is a federally registered historic landmark. Come and support San Mateo County’s only university!

Please join us for
Charter Week at Notre Dame de Namur University
Celebrating the 150th anniversary of the college’s charter

In 1868, California granted NDNU its charter, making it the first institution in the state authorized to award the baccalaureate degree to women. That same year, the Ralston Mansion was completed.

Wednesday, October 10

Time Capsule Ceremony

Carl Gellert and Celia Berta Gellert Library, 6:30 p.m.

A time capsule with materials about the university will be sealed, to be opened in 50 years. NDNU President Judith Maxwell Greig presides.

History Panel Discussion

Carl Gellert and Celia Berta Gellert Library, 7:00–8:30 p.m.,

This panel features leading experts on the history of the campus and Belmont discussing the compelling stories and personalities behind the university and Ralston Mansion.

Saturday, October 13

Belmont Water Dog Run

The Belmont Water Dog Run starts in front of Ralston Mansion on the NDNU campus. To register: belmontwaterdogrun.com. Visit our table in Twin Pines Park after the race to learn more about NDNU and its history.

All Week

Exhibit on the history of NDNU, Carl Gellert and Celia Berta Gellert Library. Rarely seen memorabilia and photos from the university’s history.

Bay Area Streets and Roads Show Resilience As Cities, Counties Receive New Gas Tax Dollars

New Pothole Report Released, Vital Signs Website Updated

SAN FRANCISCO, Sept. 26, 2018 . . . Bay Area cities and counties largely managed to prevent further deterioration of their local street and road networks in 2017. Data released today by the Metropolitan Transportation Commission (MTC) show the region's 43,000 lane-miles of local streets and roads registered an average pavement condition index (PCI) score of 67 out of a maximum possible 100 points last year, as calculated on a three-year moving average basis. This marks the second year in a row that the regional average has reached 67 points, and reflects a slow but steady upward trend in which the Bay Area's average pavement score has climbed four points since 2003.

"MTC's goal is to bring all of the Bay Area's transportation assets into a state of good repair," explained MTC Chair Jake Mackenzie, who also serves as a Rohnert Park city councilmember. "For local streets and roads, that would mean boosting the regional average PCI score to about 85 points. So it's good to see the needle move in the right direction, and to see it moving faster now that cities and counties are receiving new gas tax money and other funds from last year's Senate Bill 1 transportation package. But the typical Bay Area street is still pretty worn and likely to soon need some serious work. I hope voters will keep streets and roads in mind when they consider Proposition 6 on the November ballot."

PCI scores of 90 or higher are considered "excellent." These are newly built or resurfaced streets that show little or no distress. Pavement with a PCI score in the 80 to 89 range is considered "very good,"

and shows only slight or moderate distress, requiring primarily preventive maintenance. The "good" category ranges from 70 to 79, while streets with PCI scores in the "fair" (60-69) range are becoming worn to the point where rehabilitation may be needed to prevent rapid deterioration. Because major repairs cost five to 10 times more than routine maintenance, these streets are at an especially critical stage. Roadways with PCI scores of 50 to 59 are deemed "at-risk," while those with PCI scores of 25 to 49 are considered "poor." These roads require major rehabilitation or reconstruction. Pavement with a PCI score below 25 is considered "failed." Among the region's three largest cities, San Francisco last year entered the "good" category by raising its three-year moving average score from 68 to 70, while San Jose (64) and Oakland (55) remained in the "fair" and "at-risk" classifications respectively.

"Thanks to generous Oakland voters who passed Measure KK, our city's roads are finally getting the paving they desperately need," said Oakland Mayor and MTC Commissioner Libby Schaaf. "We just

[Back to Top](#)

wrapped up our Summer of Paving, rolling out 25 miles of new city roads, and now we need to keep the momentum going. SB 1 is a critical resource that ensures millions of dollars a year for road fixes in Oakland, where every resident, in every neighborhood, deserves a smooth ride.”

The Alameda County city of Dublin once again topped the list of Bay Area pavement rankings for the 2015-17 period, reporting an average PCI score of 85. Other cities with three-year PCI scores in the “very good” range include Clayton and El Cerrito (84); Brentwood, Colma and Palo Alto (83); Foster City (82); Daly City, Union City and unincorporated Solano County (81); and San Ramon (80).

The lowest-ranked pavement in the Bay Area was found in the Marin County city of Larkspur, which recorded a PCI score of 42 for 2015-17. Other jurisdictions with three-year average PCI scores in the “poor” range include Petaluma (46) and unincorporated Sonoma County (49).

MTC later this year will recognize Solano County for having the best overall pavement management strategy of any Bay Area jurisdiction, and the cities of Palo Alto and Martinez for increases in their one-year average PCI scores. Martinez raised its one-year score by 15 points to 61 from just 45 in 2016, while Palo Alto bumped its already “very good” score two points from 83 to 85.

The complete 2017 Pavement Conditions Summary — including percentages of local roadways in various conditions, and a listing of average PCI scores for the arterials, collector roadways and residential streets — for all Bay Area counties and cities is featured in a newly-updated MTC publication entitled *The Pothole Report: Bay Area Roads at Risk*, which may be accessed at mtc.ca.gov/sites/default/files/Pothole_Report_III.pdf.

In addition to the complete 2017 Pavement Conditions Summary, the new *Pothole Report* includes a primer on the cost and lifecycle of pavement; a review of the new statewide Road Maintenance and Rehabilitation Program established last year by SB 1; analysis of the impact voter approval of Proposition 6 would have on cities’ and counties’ pavement maintenance programs; and a spotlight on the specific pavement-management challenges facing Sonoma County and the vast network of roadways in the unincorporated portions of the county.

MTC’s Vital Signs website www.vitalsigns.mtc.ca.gov/street-pavement-condition provides even more detailed information on pavement conditions in each of the Bay Area’s nine counties and 101 cities, including both block-by-block analyses and a record of every municipality’s average PCI score for each year from 2003 through 2017.

MTC is the transportation planning, financing and coordinating agency for the nine-county San Francisco Bay Area.

SENATE BILL 1/PROPOSITION 6: UNDERSTANDING THE FACTS

WHAT IS SB 1/STATE TRANSPORTATION FUNDS?

Senate Bill 1 (SB 1), the Road Repair and Accountability Act of 2017, is a landmark transportation investment package that increases funding for transportation infrastructure across California by more than \$5 billion annually over the next 10 years.

SB 1 investments, funded by a combination of gas taxes and vehicle registration fees, are split equally between state-maintained transportation infrastructure and local transportation priorities including local streets, transit, and pedestrian and bicycle projects.

WHAT IS PROPOSITION 6?

Proposition 6 on the November 2018 ballot is intended to repeal SB 1.

WHAT HAPPENS IF PROPOSITION 6 PASSES?

If Proposition 6 passes, SB 1 fuel taxes and fees would be repealed. Gas and vehicle fees would be somewhat cheaper, but current SB 1-funded projects in San Mateo County to improve highways, roads, bridges, trails, pedestrian safety, and travel would be delayed indefinitely or cancelled. Proposition 6 would also require voter approval for any new, higher, or extended fuel tax or vehicle fee in the future, requiring alternative funding sources for future transportation projects.

WHAT ARE THE STATE TRANSPORTATION FUND INVESTMENTS IN SAN MATEO COUNTY?

- **\$21.5 million** to fix potholes and improve safety on local streets and roads.
- **\$4.5 million** towards bicycle, pedestrian, and safe routes to school improvements.
- **\$14.5 million** towards make bridges safer and repair traffic devices on state highways.
- **\$164 million** contribution to upgrade and improve Caltrain service.
- **\$250 million** contribution to address congestion on the US 101.
- **\$1.83 million** for climate change adaptation planning to protect the transportation network to the effects of climate change.

SB 1 FUNDS STAY IN TRANSPORTATION

On June 5, 2018, California voters approved Proposition 69, ensuring that the new funding remains dedicated to the transportation programs listed in SB 1.

OVERSIGHT OF STATE TRANSPORTATION FUNDS

SB 1/state transportation funds will have strict accountability and transparency measures.

SB 1/state transportation funds created the Independent Office of Audits and Investigations, including an Inspector General, appointed by the Governor, who will serve as the director of the Audits and Investigations Office.

Cities and counties are required to publicly adopt project lists and provide year-end reporting on completed projects.

FOR MORE INFORMATION:

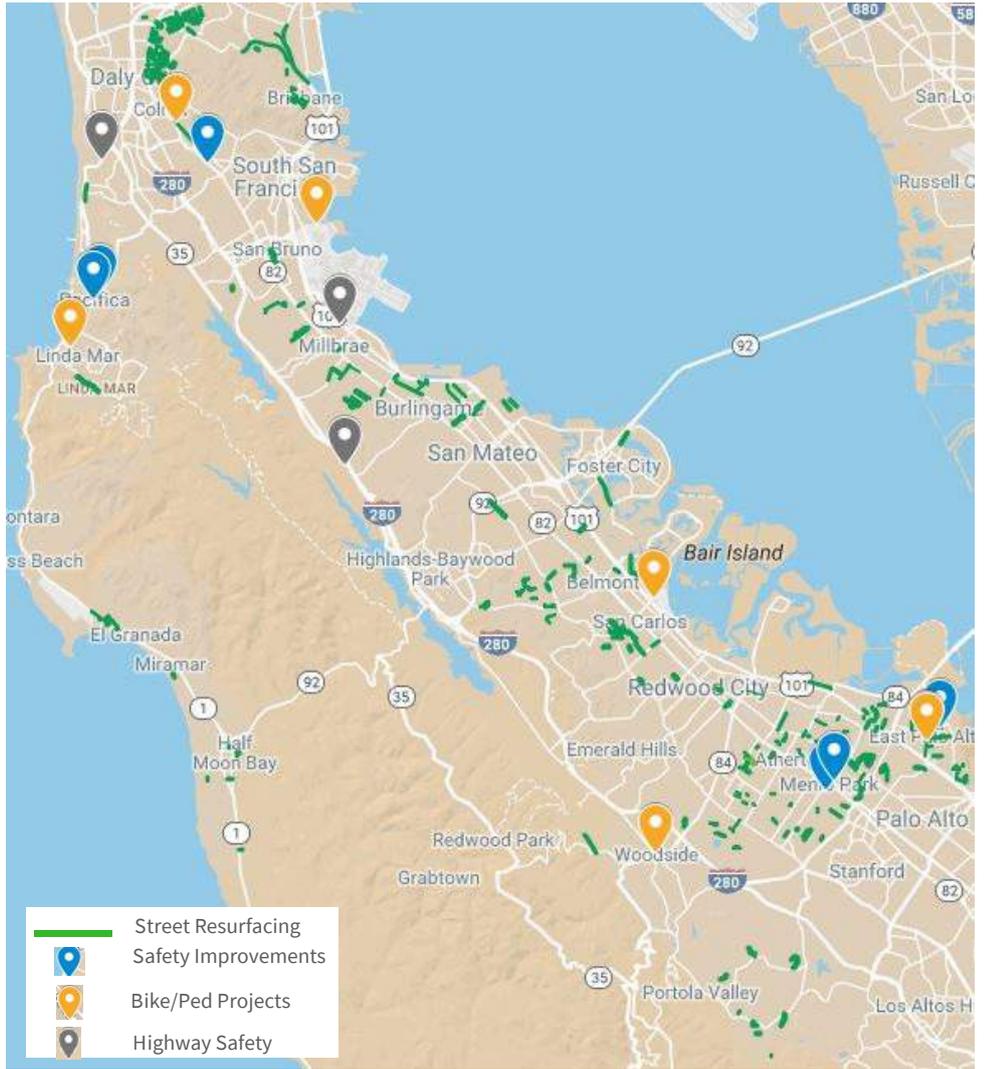

Find more information about SB 1 and where the money is going at <http://rebuildingca.ca.gov>

SB 1 - LOCAL STREETS AND ROAD MAINTENANCE FUNDING

The map and table below show local projects identified to receive SB 1 funds that benefit San Mateo County as of August 2018.

SAN MATEO COUNTY JURISDICTION	SB 1 FUNDS FOR FY 18-19
Atherton	\$ 119,600
Belmont	\$ 461,703
Brisbane	\$ 79,008
Burlingame	\$ 504,437
Colma	\$ 25,198

US 101 MANAGED LANES PROJECT

Currently there is no carpool or express lane on US 101 in San Mateo County north of Whipple Avenue, forcing buses and carpools to share lanes with solo drivers. As envisioned, a managed lane would help ease congestion by creating an incentive to use transit or carpool without removing any existing travel lanes.

Approximately \$235 million in SB 1 funding has been awarded to San Mateo County to address congestion along the US 101 corridor. These funds, together with additional local, regional, and private funding will allow construction of a managed lane in both directions on US 101 and creation of a pilot express bus service program, which will work together to incentivize carpooling and transit use on US 101 in San Mateo County. For more information on this project see: <http://www.dot.ca.gov/d4/101managedlanes/>
