

Name: Warren Lieberman

Age: 56

Occupation: Incumbent/President, Management Consulting Firm

Working together, we've accomplished much since my election to Belmont's City Council in 2005. Additionally, serving on Belmont's Finance Commission from 2000 – 2005 and my Ph.D. in Operations Research prepared me with a unique and productive perspective.

The Council's prudent fiscal management enabled Belmont to avoid making the types of extensive service cuts required elsewhere. Improvements in the economy and tax revenues are allowing us to resume sorely needed programs for infrastructure improvement that were temporarily halted.

Belmont Fire Department. A 2009 priority of mine, Belmont's Fire Department is now stable! A Joint Operating Agreement with San Mateo and Foster City is yielding significant operating and economic efficiencies; Belmont is well positioned with first class medical and emergency services now and into the future. I have championed the idea of working together with neighboring communities in innovative ways and benefitting from regional best practices; our efforts with the Belmont Fire Department have proven very successful.

Parks, Recreation, Open Spaces, and Sports. As I write this statement in August 2013, our 11/12 year-old Little League All-Stars are Northern California's Champions. They are currently competing to represent Belmont/Redwood Shores in the 2013 Little League World Series. They're making history. Congratulations, All-Stars! Their efforts remind us of our responsibility for protecting and enhancing our recreational spaces to ensure that diverse opportunities are available for all. If re-elected, I will continue to advocate for our parks, recreation areas, open spaces, and sports. Our acquisition of parcels in the San Juan Canyon to limit development in favor of open space is only one example of creative strategies we've employed to secure Belmont's future as a Green City.

Continued Priorities. Much of Belmont's infrastructure is old and needs repair. As Belmont's representative to our Waste Treatment Authority, the South Bayside System Authority, I used my detailed knowledge of Belmont's historical financial agreements to negotiate an agreement to save Belmont's residents millions of dollars as we replace our deteriorating sewage treatment infrastructure. If re-elected, I will focus on creative strategies to improve our roads, which as we all know, need a lot of work!

The knowledge and experience I have gained during my time on the City Council enables me to work productively with the other Council Members and Staff.

I have consistently advocated for community outreach. I will continue to do so.

It has been an honor and privilege to serve you. I ask for your continued support.

Thank you.
